

IMPROVE PRODUCTIVITY WITH CGC SHEETROCK® BRAND ULTRALIGHT PANELS

For more than a century, CGC has manufactured groundbreaking building solutions that set new standards for productivity, efficiency and life safety. In that time, CGC has remained committed to helping the construction industry by making its wallboard lighter, easier, faster and safer to install.

To document this level of productivity, Ducker Worldwide—a premier consulting and research firm—was tasked with capturing a realistic measurement of productivity under true field conditions while also limiting the influence of variables that could affect results.

Upon completion of this field study, Ducker Worldwide concluded that 5/8" CGC Sheetrock® Brand UltraLight Panels provide:

- Up to 10% savings in overall project installation time.
- Up to 26% savings in ceiling installation time.

At CGC, our goal is to deliver the most innovative building products and services by bringing new levels of performance to the spaces where people live, work and play.

“Ducker Worldwide concluded that 5/8" CGC Sheetrock® Brand UltraLight Panels provide up to 10% savings in overall project installation time and up to 26% savings in ceiling installation time.”

“It feels like we’ve cruised through this faster than with the regular board.”

—Hanging Contractor

TESTIMONIALS

Contractors, installers and dealers alike expressed positive reactions to CGC Sheetrock® Brand UltraLight Panels.

CONTRACTORS

We’re better able to control and maneuver the lighter weight boards, and do so over a longer period of time. Crew chiefs noticed higher energy in their crew at the end of the day.

INSTALLERS

Felt less fatigued at the end of the day and noticed less spin out when they fastened the screws to the boards.

DEALERS

Praised the lighter boards and their ability to stack more on the crane and offload more quickly.

KEY PRODUCTS

CGC Sheetrock® Brand UltraLight Panels Firecode® X—The lightest 5/8" Type X panels available are easier to lift, carry and install. The panels are listed by ULC for use in fire-rated partitions and have cUL Classification as to fire resistance, surface-burning characteristics and noncombustibility.

CGC Sheetrock® Brand UltraLight Panels Firecode 30®—Up to 30% lighter than standard 5/8" Type X, these panels are ideal for nonrated, wood- and steel-framed single-layer partitions or where building codes require only 30-minute fire ratings.

“If I could save one hour each day on a project, by the end of the week I could do five units and not have to finish over the weekend. I could get more work in, and make more money.”

—Installer

“I won’t lift 5/8" because of my back and shoulders. But this here feels like a regular 1/2" job! I would rather hang two layers of this new board [ULIX] than hang one layer of standard 5/8".”

—Contractor and Installer
