

# Project Profile

## CGC Ceiling System Offers Visual Appeal and Excellent Acoustical Performance

**Project Name:**

Surrey Outpatient Care and Surgery Centre

**Application/Building Type:**

Commercial

**Location:**

Surrey, British Columbia

**Architect:**

Kasian Architecture Interior Design and Planning Ltd.

**Featured Products:**

CGC Logix™ Integrated Ceiling System with CGC Halcyon™ Ceiling Panels

*“We selected the CGC Logix system as it has a very contemporary clean look integrated lights and other systems in an elegant form. The large format and linear lines also emphasized the design and created a pattern on the ceiling in line with the rest of the space. We also achieved a high level of sound control which was a requirement in a two story public atrium”*

*-Judith Horvath,  
Kasian Senior  
Interior Designer*

While designing the interior ceilings for the Surrey Outpatient Hospital in Surrey, British Columbia, Kasian Architecture Interior Design and Planning were faced with the task of finding a product that combined a clean monolithic ceiling with excellent acoustical performance. They chose CGC's Logix™ Integrated Ceiling System with Halcyon™ ClimaPlus™ ceiling panels.

Other products used but not photographed on this project included CGC Astro™ ClimaPlus™, CGC DONN® DX®/DXL Suspension System, CGC Compasso™ edge trim, Clean Room™ ClimaPlus™ ceiling panels, Geometrix™ & Panz® Metal Panel Systems.
