

# USG

# CEILING TECHNIX™

## A Ceilings Family Revit® Plugin

### IT'S COMPLICATED

Designing ceilings in Revit is labor intensive and time consuming. Eliminate the pain!

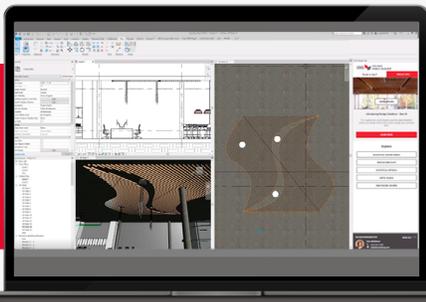

Modeling from scratch

Manual adjustments and coordination

Design and spec inconsistencies

### THE PLUGIN DOES THE HEAVY LIFTING

#### Sparks Creativity

Easily bring product catalogue to life

Turn off the shelf presets into custom layouts

#### Automates the Hard Stuff

Generate your design in a few clicks

Algorithm trims edges and accounts for columns, walls and lights

#### Streamlines Specification Accuracy

Design changes are automatically reflected in the spec

Download custom project spec on the fly

## READY FOR EASY?

You get valuable time back

Owners have the confidence to make better design decisions
